Name	G/L Source Names		
Publisher	Objects4NAV		
Description	This simple extension helps Dynamics365 Financials users to navigate to source cards that are connected to particular ledger entries. Looking at an entry under sales in your chart of accounts? All the information for the linked customer is just one click away. Same with vendor information when looking through your purchase entries.	<p>We recommend you to provide a more detailed description.</p> <p>We recommend using simple html tags to make your description more appealing. Click here for a best practice.</p>	
Summary	Add the Source Name column to your General Ledger Entries		
Long Summary	By installing and configuring this extension you will add new columns to your General Ledger Entries page. You will be able to see and drill down to the related customer or vendor.

General remarks	We recommend that you create a how to get started experience, for example an assisted setup wizard, that will guide users through the setup of your app. You can get inspired by the assisted setup wizards available in Dynamics 365 for Financials or have a look at the video "How Do I: Design wizards for html clients in Microsoft Dynamics NAV 2017?" .		
General remarks	We recommend that you create a guidance on the use-scenarios of your app (for example a click-through video).		
General remarks	Provide clear insights on which objects you have implemented changes to Dynamics 365 for Financials.
